## Solutions To Keep You On The Road

---

There have been many recent changes in the Transportation Industry. New DOT mandates threaten to alter rules and regulations that have been in place for nearly 90 years.

These new mandates impact Motor Carriers on many levels, including the way their Drivers operate which ultimately affects a companies bottom line!

Along with these new mandates which requires hardwired ELD's (Electronic Logging Devices) to be installed in all vehicles, and all drivers to be able to produce Electronic Logs, DOT has also begun more closely monitoring motor carriers in all industry sectors for total DOT Compliance.

DOT will begin imposing much more stringent penalties to motor carriers that do not take the steps to maintain DOT Compliance. That's where **ATS** comes in!
